

Electromagnetism: Princeton Prelims Edition

Problem Catalog

(IN PROGRESS)

Sara Sussman

December 2018

Contents

1	What Is This?	6
2	Basic Electrostatics	6
2.0.1	J00E1 (Two-wire Transmission Line)	6
3	Potentials	6
3.1	Separation of Variables: Cartesian	6
3.1.1	J12E1 (Parallel planes with alternating voltage)	6
3.1.2	M08E1 (Wiggler - B Field)	7
3.2	Separation of Variables: Cylindrical	7
3.2.1	P2.3 (Current Density Within Resistor With Defect)	7
3.2.2	M01E1 (Non-parallel plate capacitor)	7
3.2.3	P2.9 (Cylindrical Capacitor)	8
3.2.4	M99E3 (Dielectric Cylinder in an Electric Field)	8
3.2.5	J06E1 (Dielectric Cylinder in an Electric Field 2)	13
3.2.6	M02E2 (Dielectric Cylinder in an Electric Field 3)	13
3.2.7	J14E1 (Infinite cylinder with magnetization)	14
3.2.8	M05E2 (Coaxial Cable Motion)	14
3.3	Separation of Variables: Spherical	15
3.3.1	M06E1 (Metal sphere in a uniform electric field)	15
3.3.2	M04E1 (Conducting sphere coated with dielectric)	15
3.3.3	J10E2 (Rotating Sphere in a Magnetic Field)	15
3.3.4	J07E2 (Rotating shell of charge)	16
3.4	The Method of Images	16
3.4.1	Concepts	16
3.4.2	Example 1: Grounded infinite plane with source charge q nearby	18
3.4.3	Example 2: Grounded conducting sphere with source charge q nearby	20

3.4.4	Example 3: Conducting sphere at potential V with source charge q nearby	22
3.4.5	Example 4: Isolated conducting sphere with charge Q on it with source charge q nearby	23
3.4.6	Example 5: Conducting sphere in a constant E field . . .	23
3.4.7	Example 6: Two hemispherical shells at potentials $\pm V$. .	24
3.4.8	J03E2/J16E1 (Image Charges)	25
3.4.9	M03E2/M09E3/M07E1/J18E2 (Charge and Conducting Sphere)	27
3.4.10	J07E1 (Charge and Conducting Sphere 2)	29
3.4.11	J98E3 (Conducting Hemispheres)	30
3.4.12	M00E2 (Particle Above a Conducting Plane)	31
3.4.13	BJ97E1 (Green's Function for Charge Above Grounded Hemisphere)	34
3.4.14	P2.1 (Force on Charge Above Grounded Hemisphere) . .	34
3.5	Misc. Problems	34
3.5.1	BJ99E2 (Potential Between Two Coaxial Conducting Cones)	34
3.5.2	BJ00E2 (Potential From Dipole in the Center of Grounded Conducting Shell (Green's Function))	34
3.5.3	BS00E1 (Ring of Charge Outside Grounded Conducting Sphere (Green's Function))	34
3.5.4	BS00E2 (Leaky Coaxial Cable)	34
4	Magnetostatics	34
4.1	Magnetic Forces	34
4.1.1	J11E2 (Plate and beam of charged particles)	34
4.1.2	J01E1 (Resistance between two points on a disk)	35
4.1.3	J08E3 (Parallel Plate Diode) (Poisson's equation and the Child-Langmuir Law)	35
4.1.4	J09E2 (Ion Source)	35
4.2	The Biot-Savart Law	36
4.3	The Divergence and Curl of B	36
4.3.1	M98E2/BJ99E1 (Cylindrical Magnet and a Steel Sheet) .	36
4.3.2	P2.6 (Force of Uniformly Magnetized Cylinder on Surface)	39
4.3.3	J11E3 (Conducting cylinder with current)	39
4.3.4	J09E3 (Magnetic Pressure)	40
4.3.5	M02E3 (Current in a cylindrical wire)	41
4.4	Magnetic Vector Potential	41
4.4.1	The Vector Potential	41
4.4.2	M12E3 (Time dependent current in wire)	41
4.4.3	M03E1 (Force between current carrying wires)	41
4.5	Misc. Problems- Magnetostatics	42
4.5.1	J15E3 (Mass spectrometer)	42
4.5.2	J04E2 (Mass Spectrometer) (Angular momentum, precession)	43
4.5.3	M07E2 (Noise in a circular ring)	44

4.5.4	BS97E1 (Conducting Sphere Moving Through Uniform B Field)	45
4.5.5	BS01E1 (B Field of Magnetic Sphere in Uniform B Field)	45
4.5.6	BJ02E1 (Helmholtz Coil B field Coefficients)	45
5	E fields in Matter	45
5.0.1	J05E1 (Spherical Half-Filled Capacitor)	45
5.1	Linear Dielectrics	45
5.1.1	M15E2 (Periodic surface charge 1)	45
5.1.2	M05E1 (Periodic surface charge 2)	46
5.2	Misc. Problems	46
5.2.1	J05E3 (Dielectric Sphere in a Laser Beam)	46
6	B fields in Matter	46
6.1	Magnetization	46
6.2	The Auxiliary Field H	46
6.2.1	M08E3 (Electromagnet with an iron core)	46
6.2.2	M02E1 (Iron ring with a gap)	47
6.3	Linear and Nonlinear Media	48
6.4	Misc. Problems- B Fields in Matter	48
6.4.1	M15E3 (Oscillating B field inside a cylinder)	48
7	Electrodynamics	48
7.1	Electromotive Force	48
7.1.1	J01E2 (Betatron)	48
7.1.2	M10E3 (Torque produced by an AC induction motor)	48
7.2	Electromagnetic Induction	49
7.2.1	P2.7 (Infinite LC Circuit Dispersion Relation)	49
7.2.2	M99E2/P2.5 (5-spoke wheel)	49
7.2.3	J08E2 (Rotating Disk in a Magnet)	50
7.2.4	M06E2 (Superconducting Loop)	51
7.2.5	M00E3 (Toroidal solenoids)	51
7.2.6	M04E3/J00E2 (Penny thrown into a solenoid)	52
7.2.7	J02E3 (Levitating Frog)	52
7.2.8	J13E1 (Field Transformations)	53
7.2.9	J15E1 (Wire loop with magnetic moment)	53
7.2.10	J14E2 (Wire loop with magnetic moment 2)	53
7.2.11	J13E3 (Circuits - Complex Impedances)	54
7.2.12	J02E1 (Coaxial Transmission Line)	55
7.2.13	J04E1 (Rotating Cylindrical Capacitor)	56
7.2.14	M01E3 (Charged rotating cylindrical shells)	57
7.2.15	M12E1/J02E2 (Rotating Dielectric Cylinder around line of charge in external magnetic field)	58
7.2.16	J06E2 (Half Ring of Magnetic Material)	58
7.3	Misc. Problems- Electrodynamics	59
7.3.1	J12E3 (Uncharged particle above a superconductor)	59

7.3.2	BS98E2 (Infinite LC Circuit)	60
8	Conservation Laws	60
8.1	Maxwell's Stress Tensor	60
8.1.1	J18E3 (Find Forces using Maxwell Stress Tensor)	60
9	Electromagnetic Waves	60
9.1	Electromagnetic Waves in Matter	60
9.1.1	J01E3 (Electromagnetic wave on a slab of dielectric)	60
9.1.2	M07E3 (Plane wave in a conductor)	61
9.1.3	J14E3 (Plane wave in a conductor 2)	61
9.1.4	J03E1 (Plane wave in a conductor 3)	62
9.1.5	J98E1 (EM wave incident on a lossy dielectric)	63
9.1.6	J05E2 (Light Incident on a Medium)	63
9.1.7	M10E1 (Birefringent Material- Dielectric Tensor)	64
9.1.8	M00E1 (Emitted flux density) (Kirchhoff's law of heat radiation)	65
9.1.9	J15E2 (Fresnel rhomb; polarization)	66
9.1.10	J18E1 (Faraday Effect)	67
9.2	Absorption and Dispersion	67
9.2.1	J07E3 (Negative Dielectric Constant)	67
9.2.2	P2.2/M03E3 (EM Wave in Plasma)	68
9.2.3	M01E2 (Radio waves in a gas of charged particles, i.e. plasma)	69
9.2.4	J12E2 (Radio waves in plasma 2)	70
9.3	Diffraction	71
9.3.1	P2.8 (Diffraction Pattern of EM Wave)	71
9.4	Waveguides	71
9.4.1	J11E1 (TEM mode in coaxial waveguide)	71
9.4.2	J10E3 (Dielectric Waveguide)	71
9.4.3	J16E3 (Slicing a Waveguide)	72
9.4.4	M09E1 (Cavity Dynamics)	73
9.5	Misc. Problems- Waves	74
9.5.1	J99E1 (Charged Particle Trap)	74
9.5.2	BJ98E1 (Plane Wave Propagating Through Dielectric)	75
9.5.3	BS01E2 (Modes in a Given Waveguide)	75
10	Potentials and Fields	75
10.1	The Potential Formulation	75
10.1.1	Scalar and Vector Potentials	75
10.1.2	Gauge Transformations	75
10.1.3	Coulomb Gauge and Lorentz Gauge	75
10.1.4	Lorentz Force Law in Potential Form	75
10.2	Retarded Potentials	75
10.3	Point Charges (LW Potentials)	75
10.4	Misc. Problems- Potentials and Fields	75

11 Radiation	75
11.1 Dipole Radiation	75
11.1.1 Electric Dipole Radiation	75
11.1.2 J00E3 (A phased antenna array)	75
11.1.3 J16E2 (Long Antenna Pattern)	76
11.1.4 M10E2 (Square loop antenna)	76
11.1.5 J10E1 (Oscillating dipole near a conducting plane)	77
11.1.6 Magnetic Dipole Radiation	78
11.1.7 J08E1 (Radiation from an Antenna)	78
11.1.8 M98E3 (Magnetic field of the earth)	78
11.1.9 M09E2 (Pulsar)	79
11.1.10 J99E3 (Pulsar 2)	79
11.1.11 M99E1 (Radiation from a rotating sphere)	79
11.1.12 Radiation from an Arbitrary Source	80
11.1.13 J03E3 (Rotating Charged Rod)	80
11.1.14 J98E2 (Rotating Charged Rod 2)	81
11.2 Point Charges	81
11.2.1 Power Radiated by a Point Charge	81
11.2.2 M12E2 (Thomson scattering 1)	81
11.2.3 J04E3 (Thomson scattering 2)	81
11.2.4 M05E3/M04E2/Griffiths 11.14 (Electron Orbit Decay)	82
11.2.5 M06E3/P2.10 (Radiation from a falling electron)	83
11.2.6 M08E2 (Accelerating Point Charge)	83
11.2.7 J13E2 (Radiating fields)	84
11.2.8 M15E1 (Radiating charge in a B field)	84
11.3 Radiation Reaction	85
11.3.1 J06E3 (Harmonic Oscillator Radiation)	85
11.4 Radiation from a Wire	86
11.4.1 M98E1 (Field of a Wire)	86
11.4.2 P2.4 (Wire with Time Dependent Current)	90
11.4.3 BJ02E2 (Oscillating Current in a Wire)	93
11.5 Misc. Problems- Radiation	93
11.5.1 J99E2 (Transverse momentum from an EM wave)	93
11.5.2 BJ97E2 (Rotating Uniformly Charged Sphere)	93
11.5.3 BS97E2 (Electron with Propagating EM Radiation)	93
11.5.4 BJ98E2 (Charged Particle Above Plane with Metallic/Insulating Strips)	93
11.5.5 BS98E1 (Moving Sheet of Charge)	93
11.5.6 BJ00E1 (Oscillating Spherically Symmetric Charge Distribution)	93
12 Electrodynamics and Relativity	93
12.0.1 J09E1 (Motion in EM Fields)	93
