

Quantum Mechanics Prelims (IN PROGRESS)

Sara Sussman

September 2018

Contents

1	What Is This?	7
2	Fundamentals of Quantum Mechanics	7
2.1	Methods	7
2.2	GH11 (Commutators)	7
2.3	GH14 (Projection operators)	7
2.4	GH15 (Exponentiating Matrices)	8
3	The Uncertainty Principle	9
3.1	Methods	9
3.2	GH12 (Generalized Uncertainty Principle)	9
3.3	J13Q1 (Uncertainty Principle and Expectation Values)	9
4	Angular Momentum	10
4.1	Methods	10
4.2	M04Q2/J11Q3/GF122 (Interacting Spins 1)	12
4.3	J99Q2/M13Q3 (Interacting Spins 2)	15
4.4	M02Q2 (Interacting Spins 3)	17
4.5	M98Q1/M12Q3 (Interacting Spins 4)	17
4.6	BS99Q2 (Ammonia Molecule Rigid Rotor)	18
5	Addition of Angular Momentum	18
5.1	Methods	18
5.2	J10Q2/GF092/GF113 (CG Coefficients)	18
5.3	M03Q3 (CG Coefficients 2)	19
5.4	M00Q3/J03Q3/J16Q2 (Emission of Alpha Particles (CG Coefficients))	20
5.5	BJ99Q2 (Possibilities for Adding Angular Momenta)	21

6	Time Evolution	21
6.1	Methods	21
6.2	M08Q3/M09Q2 (Measuring at Certain Times)	21
6.3	J04Q3 (Measuring at Certain Times 2)	22
6.4	J11Q1/GF111 (Measuring at Certain Times 3)	22
6.5	J01Q3 (Measuring at Certain Times 4)	23
6.6	M99Q1 (Coupled/Uncoupled)	24
7	Virial Theorem	25
7.1	Methods	25
7.2	M07Q1 (Quantum Virial Theorem)	25
8	1D Quantum Mechanics	27
8.1	Methods	27
8.2	GH13 (Momentum/Position Space)	28
8.3	GM092 (“Top hat” momentum distribution)	29
8.4	J04Q2 (Galilean Boosted Wave Function)	30
8.5	J02Q2 (Wave Functions and Coordinate Frames)	33
8.6	GM112 (Infinite Well Solution)	35
8.7	M06Q1 (1/x Potential)	35
8.8	J07Q2/GH41 (Potential Step)	37
8.9	BJ02Q1 (Delta Function Well)	38
8.10	M07Q3/GH44/GF091 (Delta Function Infinite Well)	38
8.11	M08Q1/GM111/GM121 (Double Delta Function Well)	38
8.12	M15Q1 (Double Delta Function Well 2)	39
8.13	J98Q2 (Double Delta Function Well 3)	40
8.14	J14Q1 (Double Delta Function Well 4)	40
8.15	GM102 (Scattering from Delta Function Well)	41
8.16	J01Q2 (Scattering from Double Delta Function Well)	41
8.17	J10Q3 (Spin-Dependent Scattering)	42
8.18	BS98Q1 (Brick Dropped Into Infinite Well)	43
8.19	P3.2 (Infinite Well Which Adiabatically Expands)	43
8.20	P3.8 (N Connected 1-D Regions)	43
9	Heisenberg Picture	43
9.1	Methods	43
9.2	J06Q1 (Position and Momentum)	44
9.3	M02Q1 (Driven Harmonic Oscillator)	48
9.4	M03Q1 (Flipping Spins with a B Field)	51
10	Quantum Harmonic Oscillators	52
10.1	Methods	52
10.2	J09Q1 (Spin/Spatial)	53
10.3	M08Q2 (Ladder Operators)	53
10.4	J14Q3 (Harmonic Oscillator Coupled to Spin-1/2 Particle)	54
10.5	M15Q2 (3D Harmonic Oscillator in an E Field)	55

10.6	BS97Q2 (Harmonic Oscillator in E field)	56
10.7	J13Q3 (Ground State of Two Interacting 3D Particles)	56
10.8	J15Q1 (Helium Atom with Hooke's Law)	56
10.9	BS00Q1 (Particle Stretched by Two Identical Springs)	57
11	Probability Current	57
11.1	Methods	57
12	Aharonov-Bohm Effect	57
12.1	Methods	57
13	Charged Particles in a B Field / Gauges	57
13.1	Methods	57
13.2	GH62/GF121 (Crossed E and B Fields)	57
13.3	P3.3 (Charged Particle In Crossed E/B Fields)	58
13.4	J00Q3 (Electron on a Ring in a B Field)	58
13.5	J12Q3 (Particle on a Ring with a Solenoid)	58
13.6	M02Q3/J16Q3/GH63/GF092 (Scattering from a Magnetic Barrier)	58
13.7	BS99Q1 (Charged Particle Confined to Uniformly Charged Infinite Plane)	60
13.8	BJ00Q2 (Stern Gerlach Experiment (Vector Potential))	60
13.9	BS01Q1 (Time Evolution of Electron in a B Field)	60
13.10	P3.6 (Time Evolution of Electron in Two Combined B Fields)	60
14	Hydrogenlike Atom: Orbital Ang. Mom. and Spherical Harmonics	60
14.1	Methods	60
15	Hydrogen-like Atom: Radial Equation and Wave Functions	60
15.1	J99Q1 (Hydrogen Molecule)	60
15.2	J02Q1/GH72 (Particle in Spherically Symmetric Potential)	61
15.3	J08Q1/GH71 (Particle in Spherically Symmetric Potential 2)	61
15.4	M12Q2/GF124 (Tritium Decaying)	62
15.5	GH74 (An electron outside liquid Helium)	65
16	Hydrogen-like Atoms and Molecules	66
16.1	Methods	66
16.2	M01Q2/J18Q1 (Two Hydrogen Atoms)	66
16.3	M10Q1 (Energy of a Large Atom)	67
17	Non-Degenerate Time Independent Perturbation Theory	68
17.1	Methods	68
17.2	Example 1: Infinite Square Well with Delta Function Correction	71
17.3	Example 2: Anharmonic Oscillator	71
17.4	M10Q2 (Anharmonic Oscillator)	71
17.5	J05Q2 (Charged Particle on a Ring in an E Field)	72
17.6	J00Q2 (Two Interacting Particles)	72

17.7	J98Q1 (Parity Violation)	73
17.8	M05Q3 (Nitrogen and Explosives)	75
18	Degenerate Time Independent Perturbation Theory	76
18.1	Methods	76
18.2	GH92 (A particle in a 2D box)	76
18.3	GH93/GF101 (Two interacting particles confined to a box) . . .	76
18.4	M00Q1 (Harmonic Oscillator in a B Field)	77
19	Fine Structure	78
19.1	Methods	78
19.2	M99Q2 (Excited States of Helium)	78
19.3	BJ98Q2 (Helium Atom)	78
19.4	BJ99Q1 (Helium Atom in Uniform B Field)	78
20	Hyperfine Structure and Zeeman Effect	78
20.1	Methods	78
20.2	GH94 (Zeeman splitting)	78
20.3	GF102 (Zeeman splitting of valence electron states)	80
20.4	J98Q3/M13Q1 (Hyperfine Structure with B Field)	80
20.5	M00Q2/M10Q3 (Hyperfine Structure with B Field 2)	84
20.6	M09Q1 (Hydrogen Beam)	85
20.7	P3.10 (Hyperfine Splitting)	85
21	Identical Particles	85
21.1	Example 0:	85
21.2	Example 1	86
21.3	Example 2: (J06Q2/J13Q2)	87
21.4	Example 3	87
21.5	M04Q1/GH111 (Hydrogen Molecule)	88
21.6	J06Q2/J13Q2 (Two Bosons on a Ring)	90
21.7	J12Q2 (Spin 1/2 Particles Interacting)	92
22	Degenerate Fermi Systems	92
22.1	Methods	92
23	Variational Method	92
23.1	Methods	92
23.2	J04Q1 (Variational Method)	92
23.3	J15Q3 (Variational Method)	93
23.4	M98Q3 (Variational Method)	94
24	WKB Approximation	95
24.1	Methods	95
24.2	J09Q2 (Scattering an Electron from a “Step” in a B Field) . . .	95
24.3	J18Q2 (Tunneling Through Linear Potential Barrier)	95
24.4	BS01Q2 (Scattering Off Quadratic Potential)	96

24.5	BJ02Q2 (Bound States of Finite V-Shaped Well)	96
25	TDPT	96
25.1	Methods	96
25.2	J06Q3/J08Q2 (Time Dependent Hamiltonian)	96
25.3	J11Q2/GF112 (Perturbed Well)	97
25.4	M06Q3/J01Q1/J16Q1 (Two Interacting Particles)	97
25.5	J12Q1 (Two Level System with Sinusoidal Perturbation)	98
25.6	J02Q3 (Interacting Particles on a Line)	98
25.7	J10Q1 (Harmonic Oscillator)	99
25.8	J09Q3 (Trapping Atoms in Optical Lattice)	99
25.9	J15Q2/J03Q2 (Heavy Particle Flying Past Hydrogen Atom)	100
25.10	J05Q3 (Heavy Particle Flying Past Hydrogen Atom 3)	101
25.11	BS00Q2 (Nucleus in Rotating B Field)	102
25.12	P3.9 (Neutron Beam in Rotating B Field)	102
25.13	P3.4 (3D Harmonic Oscillator Potential Perturbed by Time De- pendent E Field)	102
26	Fermi's Golden Rule	102
27	Electric Dipole Approximation	102
27.1	J08Q3 (Photoelectric Effect)	102
28	Spontaneous Emission/Transition Rates	102
28.1	Methods	102
28.2	GF093 (Electric pulse)	102
28.3	GF103/GF123 (Electric pulse 2)	103
28.4	GF114 (Coulomb Excitation)	104
28.5	J99Q3 (Electron Transition out of a Square Well)	104
28.6	J07Q1/M13Q2/GH121 (Particle Transitioning out of Delta Func- tion Potential)	105
28.7	GF094 (Particle in a box with time dependent delta function potential)	105
28.8	M05Q1 (Hydrogen Atom in an E Field)	106
29	Hamiltonian with Extreme Time Dependence (Sudden approx, Adiabatic approx)	107
29.1	Methods	107
30	Berry's Phase	107
30.1	Methods	107
30.2	M01Q1 (The Berry Phase)	107
30.3	J07Q3 (Triangular Molecule)	108

31 Born Approximation	109
31.1 Methods	109
31.2 M15Q3 (Scattering from a Yukawa Potential)	109
31.3 J00Q1 (Scattering from Central Potential)	110
31.4 M04Q3/GH123 (Scattering from a Cube Potential)	110
31.5 M98Q2/J14Q2 (Scattering from Spherical Potential)	111
31.6 M07Q2 (Scattering from 3D Spherically Symmetric Square Potential)	111
31.7 M09Q3 (Pion-atom Scattering)	112
31.8 P3.7 (Pion-Nucleon Scattering (Isospin))	113
31.9 P3.5 (Resonance for Scattering off Spinless Heavy Particle)	113
31.10M01Q3 (Transmission through a Grid (2D))	113
32 Spherically Symmetric Potential (Partial Wave Analysis)	114
32.1 Methods	114
32.2 J03Q1 (Central Potential Scattering)	114
32.3 M12Q1/GF125 (Central Potential Scattering 2)	114
33 Low Energy Scattering and Bound States	115
33.1 Methods	115
33.2 GH122 (Spherical Square Potential)	115
33.3 M03Q2 (S-wave Scattering)	115
33.4 M05Q2 (S-wave Scattering 2)	116
33.5 GF095/GF115 (Scattering from a Spherical Shell (s-wave and also Born approx.))	117
33.6 BJ00Q1 (Scattering Off Delta Function Potential)	117
33.7 P3.1 (Scattering Off 3D Delta Function Potential)	117
34 Misc. Scattering	117
34.1 GH124 (Neutron Capture)	117
34.2 BJ97Q2 (Correction to Mott Scattering)	118
34.3 BS97Q1 (Plane Wave Interacts with Two-State System)	118
35 Bell's Inequality	118
35.1 Methods	118
36 Entanglement	118
36.1 Methods	118
36.2 J05Q1 (Fermion Entanglement (Density Matrix))	118
36.3 BS98Q2 (Density Matrix for Two Spin 1/2 Particles)	118
36.4 M06Q2 (EPR Beam Splitter)	118
36.5 M99Q3 (Beam Me Up, Charlie (EPR))	122
37 Misc. Problems	123
37.1 BJ98Q1 (Normalizing Linear Momentum Eigenstates)	123
37.2 BJ97Q1 (Collective Interaction)	123
