RESEARCH EXPERIENCE

Undergraduate Researcher, Prof. Kearns Group, Boston University

9/2016 - present

Super-Kamiokande (SK) and Hyper-Kamiokande (HK) Collaborations

Senior Research Project: Dinucleon and Nucleon Decay into Two-Body Final States with No Hadrons Searched for 10 dinucleon and nucleon decay modes using the entire SK dataset.

SK Event Reconstruction Software Developer: APFIT

Located and solved a set of Cherenkov-ring-counting issues.

HK Front-end Electronics Developer: Prototype QTC-TDC Board

Wrote DAQ software, tested QTC/TDC performance, FPGA programming to improve performance.

SK Outer Detector High Voltage Expert

Developed remote control software for new HV crates, integrated and installed new crates in SK.

$\ \, \textbf{Undergraduate Researcher, Prof. Franklin Group, Harvard University} \\$

12/2015 - 9/2016

ATLAS Collaboration

Website: Find Problematic Muon Spectrometer Detector Elements: http://cern.ch/muons/

Users upload eta-phi histograms and learn which elements overlay spatial coordinates in question.

DAQ Software for Prototype Micromegas Apparatus

Wrote and tested geometry and track reconstruction library for ATLAS muon upgrade prototype.

Awards

Joseph Henry Merit Prize, Princeton University	2018
College Prize in Physics, Boston University	2018
April APS Meeting Student Travel Awards, DPF and SPS	4/2018
International Neutrino Summer School (INSS), Poster Competition, 3rd Prize	Fermilab, 8/2017
INSS Group Tutorial, Oral Presentation Competition, 2nd Prize	Fermilab, 8/2017
Undergraduate Research Opportunities Program Fellowship, Boston University	2017,2018

RECENT PRESENTATIONS

Dinucleon and Nucleon Decay into Two-Body Final States with No Hadrons	APS April Meeting
Prototype Front-End Electronics for Hyper-Kamiokande QTC-TDC Board	Columbus OH, 4/14/18 BU Advanced Lab Seminar Boston MA, 10/15/2017
Multi-GeV Multi-Ring Event Reconstruction in Super-Kamiokande (Poster)	INSS, Fermilab Batavia IL, 8/17/2017
Side By Side: ν Event Simulation in Super-K, NOvA and ArgoNeuT	INSS, Fermilab Batavia IL, 8/17/2017

GRADUATE COURSES COMPLETED

Physics: Advanced Particle Physics I; Introduction to Particle Physics; Cosmology

Engineering/Design: Electronics for Scientists; Advanced Laboratory

Math: Mathematical Physics

Research Mentor (Hardware)

Fermilab

Mentored high school summer intern at Fermilab with Dr. Jin-Yuan Wu.

Batavia IL, 8/2017

Math Mentor

Girls' Angle

Guided female K-8 students in creative mathematical explorations.

Cambridge MA, 2015

Student-Teacher and Volunteer

 $Charlestown\ High\ School$

Taught high school juniors and seniors calculus and precalculus.

Boston MA, 2015

Teacher, Junction and Splash!

Educational Studies Program

Taught topics in physics, math and chess to high school students at MIT.

Cambridge, MA 2014-15

Corps Member

City Year Boston

Tutored and mentored K-8 students in math in a bilingual Dorchester school.

Boston MA, 2013-2014

LEADERSHIP

Director, Junction

MIT, Cambridge MA, 2015

Redesigned summer program where 41 high school students do independent research with 1:1 mentoring. See more at this link.

Director, Spring High School Studies Program (HSSP)

MIT, Cambridge MA, 2015

Led six week Saturday program where 500 high school students take courses taught by undergraduates.

Director, Denney Math

Dorchester MA, 2014

Created a weekly evening inquiry-based algebra class for local teenagers.

Director, The Checkmate Club

Dorchester MA, 2013-2014

Created a weekly math, logic and chess program for local teenagers.

Assistant Crew Leader, The Food Project

Dorchester & Lincoln, MA, 2012-2013

Led a diverse group of 15 teenagers in urban/rural farming and discussed social justice issues.

SKILLS

Programming: C/C++, Python, FORTRAN, ROOT, Mathematica, MATLAB, Verilog, VHDL, JavaScript, HTML/CSS

Software: Intel Quartus Prime, Xilinx Vivado Design Suite, ExpressPCB

Hardware: Cherenkov detectors, high voltage systems, gaseous ionization detectors, data acquisition and timing systems, digital and analog circuits, lab equipment such as NIM modules, multichannel analyzers and oscilloscopes, basic machining with mills and laser cutters (plastic and steel)
